Quarterly Field Report

Prepared by the district monitoring team for internal review purposes.

1. Summary of Activities

The team completed twenty-three site visits across four blocks during the quarter. Attendance remained above the target threshold at every site.

1.1 Key Highlights

- Twelve schools received new library stock
- Four health sub-centres passed the hygiene audit
- Two villages reported full immunisation coverage

2. Observations

Field staff noted three recurring issues that require attention:

1. Delayed supply of printed registers
2. Irregular internet connectivity at two centres
3. Vacant positions affecting weekend coverage

Overall, the quarter closed within the approved budget and all statutory filings were submitted before the fifteenth of the closing month.

3. Next Quarter Plan

The following priorities were agreed at the review meeting held on the last Friday of the quarter, pending secretariat approval:

- Complete the pending two blocks of site visits
- Publish the consolidated attendance dashboard
- Conduct refresher training for new field assistants

3.1 Budget Notes

Funds already sanctioned cover travel and printing costs. Any additional expenditure above the delegated limit will need committee clearance.
