Quarterly Report

DocoPDF Viewer QA Fixture

This document tests the View PDF tool: zoom, search, thumbnails and layout modes.

Introduction

The viewer renders pages on your device with the self-hosted pdf.js engine. Nothing is uploaded anywhere.

Search Test Page

The quick brown fox jumps over the lazy dog. The magic keyword pineapple appears here for search testing.

More Content

Zoom controls support 25 to 400 percent. Fit width and fit page are available. Press G to go to a page.

Another Match

A second pineapple mention lives on this page, so search should report at least two matches across pages.

Summary

Dark reading mode inverts pages for comfortable reading. Two page spread shows facing pages side by side.
